

Amendments to the Specification:

Please replace the paragraph beginning at page 6, line 3 to line 11, with the following rewritten paragraph:

In some embodiments, connection 116 includes one or more logical ports, also termed herein simply ports. For example, in ~~transition~~ transmission control protocol/internet protocol (TCP/IP), conventionally, up to 65,535 ports are assignable to a single IP address. Generally, a port number identifies the type of port. For example, currently, port 80 is a hypertext transfer protocol (HTTP) port. TCP/IP and logical ports are well-known to those of skill in the art and are not further described herein.
